
GIGGLE 64
THE GAUNTLET OF FIRE

Giggle 64: The Gauntlet of Fire

Thank you for choosing **Giggle 64: The Gauntlet of Fire** from Unknown Vengeance Studios.

Please read this instruction booklet all the way through so you get the most out of your adventure. Keep it somewhere safe. You never know when a knight might need it.

A WORD BEFORE YOU SET OUT

- Take a 10 to 15 minute break every hour, even when the Gauntlet is calling.
- Play in a well-lit room, and sit a comfortable distance from the screen.
- Rest your hands if they get tired or sore. Sir Gigglebuns will wait.

Giggle 64 is played with an Xbox-style controller, or with a keyboard and mouse. Pictures in this booklet show the Xbox button icons. You can switch the icons to PlayStation or Nintendo styles in OPTIONS (see page 23).

The Legend of Bunsriel

Before there was anything at all, the Cosmic Deity **Lothelye** dreamt, and her dream became the world of **Bunsriel**.

From the dream came three goddesses. **Alan**, Goddess of the Harvest, woke the fields and forests. **Aphiel**, Lady of the Sky, gave the world its winds and rivers. And **Serielye**, Goddess of Destruction, made the fire under the mountains, so that what was built could also end.

When the Dark Lord **Denangdyn** rose out of the hells, Lothelye sent a nameless warrior to stand against him. In his hand was a sword that held the power of all three goddesses: the **Magical Sword of Bun**.

The war was long, but at its end the warrior struck Denangdyn down and sealed him beyond the stars.

Ages passed. Kings rose and fell. And far away, in a mountain that was once a goddess's forge, a terrible thing was locked inside Serielye's ice, where no one would ever find it:

the Gauntlet of Fire.

Lothelye, the Cosmic Deity, who dreamt the world.

A Fire in the East

One stormy night, a figure walked into the frozen forge. Fire sprang up in his footsteps. He was **Firebuns III**, heir of the Evil King, and he had waited a very long time.

> *"Serielye's ice, is it? How like her. To make a thing that can burn the world... and then put it somewhere cold, and walk away."*

The ice cracked. The Gauntlet was his.

The next morning, in the quiet village of **Haven**, there was a knock at the door of **Sir Gigglebuns IV**...

A page from the castle, out of breath, brought word from the King: fire had been seen in the far east, and the old stories were true. The **Bun Sword** had to be found and drawn, and it answers only one who carries the three goddesses' pieces of the Bun.

The road starts at the **Lake Shrine**, on **Mirror Lake**.

Your adventure begins here.

Sir Gigglebuns IV and Firebuns III.

Sir Gigglebuns IV

KNIGHT OF HAVEN

The fourth knight of his line to carry the name, and the one you will play. He lives in a little house in Haven Village, sleeps later than a knight should, and keeps his sword on his back and his shield in his hand.

His great-grandfathers fought gods and kings. He has mostly fought chickens. That is about to change.

He grows stronger as you go: more hearts, new swords and shields from Pink's Armory, magic, and techniques taught by the knights of Haven.

Friends in Haven

Pip

HERALD OF HAVEN

The King's page. Pip runs everywhere, knows everything first, and can usually be found in the castle square shouting the news.

Mira

OF MIRROR LAKE

A fisher who lives on the shore of Mirror Lake. Nobody knows the lake, or what lies under it, better than Mira.

Princess Himeko

OF HAVEN VILLAGE

Proud, sharp-tongued and braver than she lets on. She would never admit she needs your help.

Friends in Haven

Pink

OF THE ARMORY

Haven's smith. Bring her coins and she will forge you better swords and shields.

Idrith

LEADER OF THE QUESTLORDS

The Questlords are heroes of Ladhellin. You'll often find them in the armory.

Ottilie

OF THE HAVEN LIBRARY

If it was ever written down, Ottilie has read it. Old books, old tongues, old prophecies.

Marigold

OF THE VILLAGE STORE

Arrows, nuts, milk and more, at honest prices (mostly).

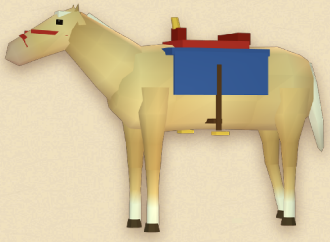

Friend and Foe

Clover

Of the Southern Fields

Runs the ranch and the corral on the Southern Fields. Win her races and she may trust you with a horse.

Biscuit

The Horse

Fast, loyal and very fond of sugar. Once she's yours, she comes running when you call.

Firebuns III

Heir of the Evil King

He has the Gauntlet of Fire, and he means to burn Bunsriel with it. Be careful, Sir Gigglebuns.

Using the Controller

LT
Lock-On

LB

MENU
Pause screen

R STICK
Camera / look

Plug in an Xbox, PlayStation or Nintendo-style controller before you start. The button icons on screen match the controller you use.

Using the Controller

The A button does a bit of everything

What A does depends on where you are. Look at the A icon at the top of the screen to see what it will do right now.

Next to a door, chest or sign	`OPEN` / `CHECK`
Next to someone	`SPEAK`
Next to a pot, rock or shrub	`GRAB`, then A to `THROW`
Running	`ROLL`
Standing, sword out	`PUT AWAY`
Locked on (hold LT)	jump slash, side hop, back flip
In deep water	`DIVE`

A never jumps. Run off a ledge and Sir Gigglebuns jumps by himself. Walk into a ledge that's low enough and he climbs up.

Keyboard and mouse

Move	W A S D (hold CTRL to walk)
A **Action**	SPACE or E
B **Sword**	Left click or J
X / Y **Items**	1 / 2 (or U / O)
RT **Shield**	Right click or K
LT **Lock-On**	Q, L or middle click
RB **Look**	F or I
LB **Camera**	SHIFT
Pause	ESC
Minimap	M

Every button can be changed in `OPTIONS` > `CONTROLS`.

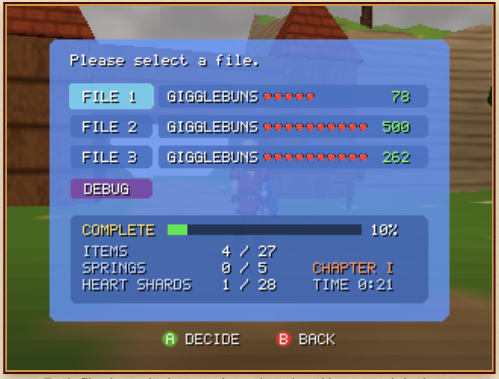

Press START on the title screen. If you wait, the title shows scenes from the world of Bunsriel.

The title screen.

Choosing a file

There are three files, so three adventures can be saved at once. Pick an empty file to start a new game, or a used one to carry on where you left off.

Each file shows its hearts, time played and how much is done.

To erase a file, pick it and choose ERASE FILE. An erased file is gone for good.

Saving and Game Over

Saving your game

Press START to open the pause screen, then press B.

When asked `WOULD YOU LIKE TO SAVE?`, choose `YES`.

When you load a file, you start back at home, or at the entrance of the dungeon you were in.

Pip's Tip Save before you go into a dungeon or anywhere that looks dangerous. A Hero should always be prepared!

Game Over

When your last heart runs out, it's `GAME OVER`. You can choose to:

- `CONTINUE`: go back to where you came in, with three hearts.
- `SAVE & CONTINUE`: save first, then continue.
- `SAVE & QUIT`: save and go back to the title.

A fairy in a bottle will bring you back before it comes to that.

The Game Screen

1. **Life hearts.** You lose hearts when you're hurt. When they're gone, it's Game Over.
2. **Magic meter.** Shows up once you can use magic. Magic items drain it.
3. **B button.** Your sword.
4. **A button.** Shows what A does right now.
5. **X and Y buttons.** The items you've put on them, and how many are left.
6. **RB.** The first-person view.
7. **Coins.** Your money. A bigger wallet holds more.
8. **Minimap.** Where you are, and which way you're facing. Press SELECT to hide it.
9. **Button guide.** Reminds you what each button does right now.

Hearts, Coins and Magic

Hearts

Small hearts are hidden in grass, pots and defeated foes. Each one gives back a heart.

Heart Shards

Hidden all over Bunsriel. Collect four to gain a whole new heart.

Heart Vessels

Usually waiting for whoever beats a dungeon's master. Each one gives you another heart, and refills all of them.

Coins

Green, blue, red and rarer colors, each worth more. Spend them in shops and at Pink's Armory.

Magic Jars

Refill your magic meter.

Fairies

A fairy heals you when you touch her. Catch one in a bottle and she'll bring you back if you fall.

Walking and running

Tilt the left stick a little to walk, and all the way to run. Push the stick and press A to roll.

Ledges and ladders

Walk into a low ledge to climb it, or off an edge to jump. Hanging from a ledge, push up to climb or press A to drop. Walk into a ladder to climb it.

Talking

Walk up to someone and press A when the icon says SPEAK. Press A to read on.

People in Haven love to gossip. If you're lost, ask around!

Swimming

Wade into deep water and you'll swim. Press A to dive, and hold it to go deeper. Push into a low bank to climb out.

The camera

Press LB to put the camera behind you. With the camera set to MODERN, the right stick turns it.

Lock-On

When an enemy is nearby, press LT to lock on. The camera keeps both of you in view and every swing heads straight for your target. Push the stick to circle around it.

With nothing to lock on to, hold LT to face straight ahead. You can side-step and back up while still facing the same way.

Locked on to a goblin.

While locked on, A lets you:

Stick forward + A	Jump Slash
Stick left / right + A	Side Hop
Stick back + A	Back Flip

Pip's Tip You can choose between `SWITCH` or `HOLD` for the lock-on button in `OPTIONS`, whatever suits you!

Some enemies can only be hurt from behind, or after you block their attack. Watch how they move!

The sword B

Press B to draw your sword and swing it. The way you swing depends on what you're doing:

- Standing still: a side slash.
- Pushing the stick: a slash forward.
- Locked on: a stab at your target.
- Press B again and again to keep swinging. A third swing of the same kind is a stronger finishing blow.
- Press B in the air to jump slash.

When the sword's out, press A with the stick still to PUT AWAY.

The shield RT

Hold RT to crouch behind your shield. Arrows and blows that hit the shield won't hurt you.

Hold RT while locked on to raise the shield and keep moving.

Sheltering behind the Wooden Shield.

A Wooden Shield isn't strong enough to stop the heaviest blows. Pink's Armory has stronger shields.

Item buttons X Y

Choose items on the SELECT ITEM page of the pause screen. Highlight one and press X or Y to put it on that button. Press the button in the field to use the item.

The Bow, the Boomerang and the Grapple Hook aim over your shoulder: hold the button, aim with the stick, and let go to fire.

Aiming the Bow at Mirror Lake.

First-person view RB

Press RB to look through Sir Gigglebuns' eyes. Look around with the stick. Press RB, A or B to look up again.

You can switch on a crosshair, or invert the up and down controls, in OPTIONS.

Riding Biscuit

Press A beside your horse to climb on. Press A to spur her to go faster (watch the carrots!) and push the stick back to slow down. Ride at a fence to jump it. Stop and press A to get off.

Out on the open fields, use a `SUGAR CUBE` and Biscuit will come running.

Galloping across Bunsriel Fields.

Fishing

Face open water with the `FISHING ROD` on X or Y and press its button. Hold A to wind up and let go to cast. When a fish bites, press A to hook it and hold A to reel it in.

Pip's Tip Mira at Mirror Lake keeps a record of the biggest fish. Can you beat it?

The Pause Screen

Press START to pause. The pause screen has six pages: push past the left or right edge of a page, or press LT / RT, to turn to the next.

SELECT ITEM

Everything in your satchel, in four rows: ARMS, TOOLS, MAGIC and PACK. Press X or Y to put the highlighted item on that button.

MAP

The map of Bunsriel. Places you haven't been yet are hidden in cloud. Inside a dungeon, find the DUNGEON MAP to see its rooms, and the COMPASS to see its chests and where its master waits.

QUEST STATUS

Here you'll find the pieces of the Bun, your Heart Shards, your time played and how much of the adventure you've finished.

JOURNAL

Sir Gigglebuns writes down every quest: the story's chapters and every errand from around the kingdom. Each entry says what to do next. Press A on an entry to see the whole quest so far.

OPTIONS

Change how the game looks, sounds and plays: GRAPHICS, SOUND, CONTROLS, the camera, rumble, the minimap and the GUIDING LIGHT.

Graphics

`TRUE N64 MODE`	Textures, colors and blur just like the real hardware.
`FRAME RATE`	21, 30 or 60 frames a second.
`ASPECT RATIO`	4:3 like the old days, or 16:9 widescreen.
`HUD STYLE`	`CLASSIC` buttons, or `MODERN` face buttons in a diamond.
`BUTTON ICONS`	Xbox, PlayStation or Nintendo icons (`AUTO` guesses from your controller).

Sound

Separate volumes for music, sound effects, ambience and voices, plus mono output.

Controls

Change any button, for the controller or the keyboard.

Guiding Light

A pale golden light stands on the road to your next goal. Turn it off if you'd rather find your own way.

Camera

`CLASSIC` keeps the camera behind you, like the old games. `MODERN` lets you turn it with the right stick.

Pip's Tip Lost? Talk to people! Everyone in Haven has something to say about where you should go next.

Items

BOW

Hold the button to draw and aim, and let go to shoot. Shoot an arrow through a flame and it catches fire.

BOMBS

Press to pull one out lit, and again to throw it. Cracked walls and boulders don't stand a chance.

PUFF NUTS

Throw one down and every foe nearby is dazed by its flash of spores.

BOOMERANG

Hold to aim and let go to throw. It stuns foes, flips switches and brings back what it hits.

GRAPPLE HOOK

A spring-loaded chain. It bites into wooden targets and pulls you across to them.

FISHING ROD

Face open water and press the button to fish. Any pond, river or lake will do.

LANTERN

Lights the dark around you. Use it beside an unlit torch to light it.

MIRA'S LOOKING GLASS

Shows what is hidden, and what isn't really there. Drains magic while you look.

BOTTLE

Swing it to catch a fairy, or fill it with something useful.

SUGAR CUBE

Use it on the open fields and your horse will come running.

...and many more for you to find on your adventure.

Gear

Squire's Sword
Light and quick. A fine sword to start an adventure with.

Red Sword
Forged at Pink's Armory. It hits twice as hard as the Squire's Sword.

Wooden Shield
Light, but the heaviest blows go right through it.

Iron Shield
Heavy enough to stop almost anything. Pink's best work.

Haven Tunic
The red tunic of a knight of Haven.

Leather Boots
Good for walking, running and rolling.

Quiver
A bigger quiver holds more arrows.

Bomb Bag
A bigger bag holds more bombs.

Pip's Tip Pink's Armory sells finer blades and shields, if you've saved up enough coins. Swords can be traded in too!

Buying things

Walk up to something on a shop's counter and press A to take a look. If you want it and have the coins, choose `BUY`.

Arrows for sale at Marigold's Goods.

Some things you can only carry so much of. A bigger quiver or bomb bag holds more.

Marigold's Goods

Haven Village's store sells arrows, Puff Nuts, milk and other useful things.

Pink's Armory

Pink forges swords and shields in Old Castle Town. Bring her enough coins and she'll make you something better. The Questlords often stop by, too.

Wallets

Your wallet only holds so many coins. Look out for a bigger one!

Dungeons

Deep in the shrines and towers of Bunsriel lie puzzles, monsters and treasure. Every dungeon has:

- **Small Keys** that open a locked door each. They only work in the dungeon where you found them.
- **The Dungeon Map**, which shows every room.
- **The Compass**, which shows the chests and where the dungeon's master waits.
- **The Boss Key**, which opens the great door to the master's lair.

Most dungeons also hide a new item. It's usually the key to beating that dungeon.

Inside the Lake Shrine.

Pip's Tip If a room seems impossible, try out each of your items. And if a door won't open, there might be a switch nearby!

The kingdom stretches from the meadows of **Bunsriel Fields** and **Haven Village** out to Mirror Lake, the Southern Fields, the deserts of Ladhellin, the snows of Frostpeak and the far Batela Fells.

Loading roads join each region. Look out for the **waystones** – some say you can use them to travel quickly across the land.

Days turn into nights, and the weather changes. Some people, creatures and secrets only come out after dark.

Things to Do

Bunsriel is full of things to do besides saving it. Your JOURNAL keeps track of every errand.

- **Heart Shards.** Twenty-eight of them hidden all over the kingdom.
- **Fishing.** Every pond, river and lake has its own fish. Some only bite at night.
- **Archery and races.** Test your aim, and race Biscuit around Clover's corral.
- **Bottles.** There are four to find. Fill them with fairies, milk, fish and more.
- **Trading.** Somebody always needs something. Pass it on, and see where it leads you.
- **The Goddess Springs.** It's said the goddesses left springs hidden in the wild places of the world...

Diving for treasure in Mirror Lake.

Pip's Tip You can see how much of the adventure you've finished on the QUEST STATUS page, and on the file select.

Hints from Pip

Pip's Tip Cut the grass and smash the pots! Hearts, coins and arrows love to hide in them.

Pip's Tip Walls that look cracked can be blown open with Bombs.

Pip's Tip Heart Shards hide everywhere: under rocks, on rooftops, at the bottom of the lake. Four makes a whole heart!

Pip's Tip Watch for a column of golden light on the horizon. It shows the way to your next goal.

Pip's Tip Can't reach something? Check your items, or come back later. Some places need gear you haven't found yet.

Pip's Tip I cry the news in the castle square every day. Whatever's happening in the kingdom, I'll know first!

Pip's Tip Fairies come out over the flowers after dark. Bring an empty bottle!

Pip's Tip When a boss looks like it can't be hurt, keep watching. Every one of them has a weak spot!
